

ILLIMITIK

Open your events to immersive & live
experience

Pitch Deck Presentation

Our solution

ILLIMITIK

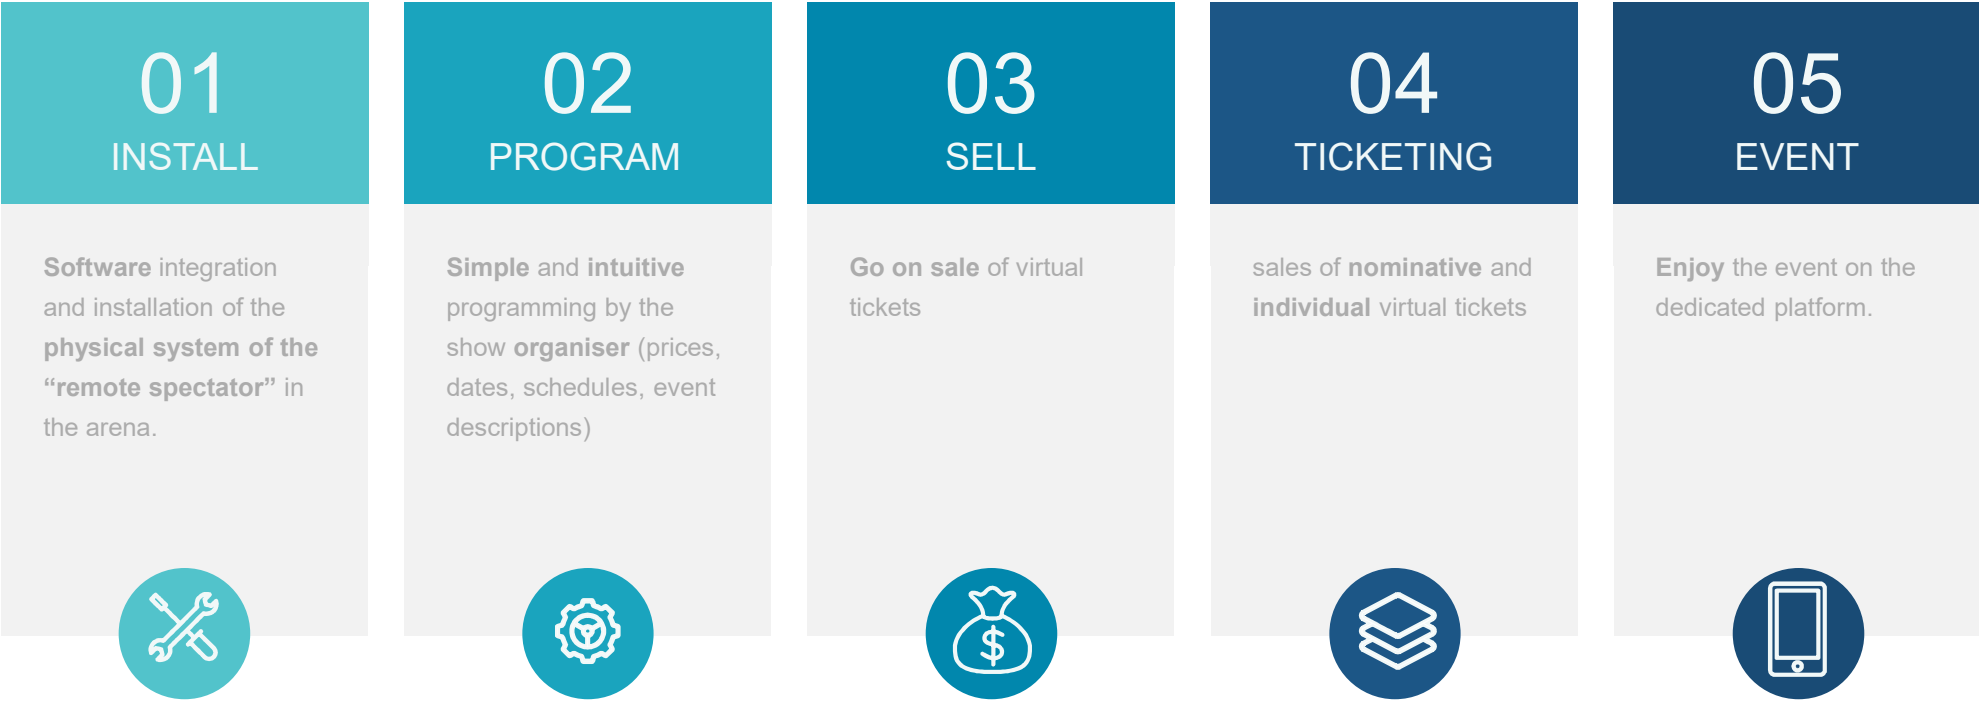

Ticketing becomes virtual, global and unlimited

Illimitik is a **complete system**, it is a dedicated seat that can only be **reserved by remote spectators**, on which a **360° device** will be installed, protected by a patent, automatic and without post-production.

The spectator is **totally immersed as a spectator** in the event thanks to a VR headset or its mobile equipment (tablets/smart-phones).

How it works ?

For our clients

REVENUE

No fixed fees and profits from the first ticket sold.

PROFITABILITY

No more physical or sanitary capacity limits.

SIMPLE

Quick, very simple and intuitive use.

OPPORTUNITIES

Ticketing opens to the entire world . New opportunities for data, sponsorship, merchandising and loyalty

EXPERIENCE

Allow your spectators to consume your events in a new way: live immersion as a spectator

COMPLETE

We offer the entire process, from capture on arena to the consumption by remote spectator ,the all managed by the ticketing system
